

AI-Driven Open Source Product Development

Three independent engagement stages — each delivering standalone value. AI-first architecture, open source stack, outcome-driven delivery. Engage one, two, or all three.

Stage 1 : Product Discovery

Stage 2 : Architecture & Roadmap

Stage 3 : Build & Scale

AI-First

01

Stage 1 : Product Discovery

FIXED PRICE USD 9,500 ⌚ 2–4 Weeks

- Stakeholder workshops
- AI opportunity mapping
- User research & personas
- Market & competitor analysis
- Feature backlog (MoSCoW)
- Scope sign-off for Stage 2/3

✓ Discovery Report + Validated AI Scope

02

Stage 2 : Architecture & Roadmap

FIXED PRICE USD 14,500 ⌚ 3–5 Weeks

- AI + OS tech stack selection
- LLM & model integration design
- System & AI architecture design
- Data model, API & LLM contracts
- MLOps + DevOps blueprint
- Sprint roadmap (6–12 wks)

✓ Architecture Blueprint + AI Roadmap

03

Stage 3 : Build & Scale

OPEN SCOPE / T&M ⌚ Ongoing

- Agile 2-week sprint delivery
- LLM / RAG / AI agent integration
- CI/CD + MLOps pipeline setup
- MVP → production-grade build
- QA, AI model & security testing
- Cloud deployment & monitoring

✓ Shipped AI-Powered Product + Live Infra

AI CAPABILITIES WE DELIVER

Generative AI & LLMs

GPT-4o, Claude, Gemini, Llama 3 — chat, content & code generation.

RAG & Knowledge Bases

Retrieval-Augmented Generation, vector search, enterprise document Q&A.

AI Agents & Automation

LangChain agents, AutoGen, CrewAI — multi-step autonomous workflows.

Predictive Analytics & ML

Forecasting, anomaly detection, recommendation engines, classification.

Computer Vision

Object detection, OCR, image classification, document processing.

NLP & Conversational AI

Sentiment analysis, entity extraction, chatbots, voice AI (Whisper/TTS).

OPEN SOURCE AI STACK

LangChain

LlamaIndex

HuggingFace

Ollama

pgvector

PyTorch

TensorFlow

scikit-learn

React / Next.js

Python / FastAPI

Node.js

Docker / Kubernetes

MLflow

AWS / Azure / GCP

GraphQL

Terraform
